Medical Progress through Technology

Medical Progress through Technology is one of the major clinically oriented journals in biomedical engineering. The journal covers recent developments in medical technology, clinical engineering, and bio-engineering which apply to the solutions of problems in clinical medicine and health care.

Medical Progress through Technology serves physicians and biomedical engineers who are concerned with the **effective application** of modern engineering and systems methodology in their respective specialties by publishing:

Reports on recent activities and developments in
Emergency Life Support Technics
Perinatology
Radiology and Nuclear Medicine
Diagnostic Laboratories
Assist Devices

Reports and reviews of advance engineering principles and technologies, especially prepared for our readers on:
Noninvasive Diagnostic Methods (Ultrasound, etc.)
Transducers
Pattern Recognition
Computer Technics, Terminals, etc.
Materials

Special reports on
Evaluations of Methods and Instruments
Safety Aspects and Standards
Economic Aspects Planning

Technical notes of academic and industrial origin on
New Methods
Instrumentation Systems
Improved Teaching Methods Related to Health Care Problems

Reports on significant **meetings** and bibliographic information on relevant **literature** in medicine and engineering.

The former policy of **Medical Progress through Technology** was to devote each issue to a single topic. Now, all forthcoming issues will each cover **several subject areas** of current interest. As a result, the reader will have more immediate access to important interdisciplinary information in his special field of interest.

Subscription Information

Volume 6 (4 issues) 1978/79. Correspondence concerning subscriptions should be addressed to the publisher.

North American Subscription Rate:
U.S. $67.40 including postage and handling. All orders must be accompanied by payment and should be addressed to:
Springer-Verlag New York Inc.,
175 Fifth Avenue, New York, NY 10010, USA.

All Countries (Except North America):
DM 148,– plus postage and handling. Orders should be addressed to:
Springer-Verlag, Heidelberger Platz 3, D-1000 Berlin 33.

Copyright
It is a fundamental condition that submitted manuscripts have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature, and translations.

Photographic reproduction, microform, or any other reproduction of text, figures, or tables from this journal is prohibited without permission obtained from the publisher.

Special Regulations for the USA
The Article Fee Code on the first page of an article in this journal indicates the copyright owner's consent that in the USA copies may be made for personal or internal use, provided the stated fee for copying beyond that permitted by Section 107 or 108 of the United States Copyright Law is paid through the Copyright Clearance Center, Inc., P.O. Box 8891, Boston, MA 02114, USA.

If a code does not appear, copies of the article may be made without charge, provided permission is obtained from the publisher.

The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such copying.

The use of general descriptive names, trade names, trade marks, etc., in this publication, even if the former are not specifically identified, is not to be taken as a sign that such names are exempt from the relevant protective laws and regulations and may accordingly be used freely by anyone.
